Patient pregnancy advisory/Consent of X-ray

I have been told that x-rays during early pregnancy may be hazardous to the development of a fetus. I have been advised to wait until my next menstruation or pregnancy test before having an x-ray procedure. Despite this warning, I wish to have the procedure today as I believe I AM NOT pregnant. I agree to release AQ modern diagnostic imaging, the performing radiologic technologist(s), of any and all responsibility if I am pregnant at this time.

Last menstrual period? _____

Name: _____

Signature: _____

Witness: _____
